

The Local Education Council (LEC) is a group of staff, family and community members that act as an advisory board to the principal under the state's mandate for local control of schools. The council meets on a monthly basis and works with the principal to determine the needs of the school, to review the yearly budget, and to develop and implement an annual School Improvement Plan to meet the assessed needs of the school. LEC meetings are posted and open to the public and everyone is invited to attend. If needed, elections are held each September to fill seats vacated by parents and staff members. Community members are invited by the principal to serve on the council.
